

Quality crafted monuments for forever memories

Established in 1940, **Twin City Monuments** takes great pride in custom designing monuments for families that provide memorials to their loved ones. As a family owned company, owners Todd and Dawn Capstick take their role seriously as the St. Louis Metropolitan area's full service monument company. The company is recognized on Google as a highest rating and most reviewed company, meaning they are consistently rated and reviewed highly among consumers.

"We are true craftsmen who are dedicated to our trade and we genuinely want to help people create meaningful memorials," Dawn said.

Twin City's craftsmanship sets it apart from other monument companies. Dawn and Todd oversee every aspect of creating a memorial. Twin City Monuments cut the granite, engrave the lettering, install the memorial and even will come back years down the road to add final dates to headstones once a person listed passes, something not all monument companies will do, Dawn said.

"Engraving the granite themselves makes a difference in the quality of the monument," Dawn said. "We use quality fonts that are deeper, wider and more easily read."

Twin City Monuments provides monuments that are flat, slanted and upright as well as other various shapes. In addition to cemetery monuments, they also can create pet memorials, landscape rocks and stone signs for subdivisions. They can professionally engrave bricks to honor donors for nonprofit organizations like hospitals, colleges and churches, and they also engrave pavers, memorial fountains and walls.
