

Quality crafted monuments for forever memories

Established in 1940, **Twin City Monuments** takes great pride in custom designing monuments for families that provide memorials to their loved ones.

Twin City Monuments' owners Todd and Dawn Capstick take their role seriously, Dawn said.

"As a family owned company, Twin City Monuments is truly a full service monument company in the St. Louis Metropolitan Area," Dawn said. "We are true craftsmen who are

dedicated to our trade, and we genuinely want to help people create these memorials."

That craftsmanship sets them apart from other monument companies, she said.

"We do every aspect of creating a memorial," Dawn said.

Twin City Monuments cuts the granite, engraves the lettering, installs the memorial and will come back years down the road to add final dates to headstones.

Engraving the granite themselves makes a difference in the quality of the monument," Dawn said. "We use quality fonts; they are deeper, wider and more easily read."

Surprisingly, it is often difficult to find companies that will come back to add death dates once a person listed on a headstone passes, she said.

Twin City Monuments provides monuments that are flat, slanted and upright as well as other various shapes. They create pet memorials, landscape rocks and stone signs for subdivisions. They professionally engrave bricks to honor donors for hospitals, colleges and churches, and they also engrave pavers, memorial fountains and walls.
