

Dental care trusted by generations of patients

Dr. Kimberly Simonds with (from left) Dr. Maya Habibi, Dr. Nick Berkenbile and Dr. Nolan Finney

"This is definitely the most unique office I have ever seen or worked at," Dr. Maya Habibi said of **Ballwin Dental Care**. "We have so much fun working with each other and our patients."

Family owned and operated, the general dentistry practice was founded by Dr. Robert Schrameyer in 1973. In 2015, Dr. Robert's daughter, Dr. Kimberly Simonds, took over. Today, the practice's patients span generations.

"I think that's pretty cool," Dr. Maya said. "We take pride in developing relationships with our patients that foster trust and help them feel comfortable with their care."

"Patients laugh when I share this, but even I don't like having to undergo dental procedures. So I really can empathize with patients who are anxious or fearful – and I'm very grateful for their trust. One of the best things a patient can say to me is, 'What do you think, Doc?'"

When it comes to protecting your overall health and smile her advice is following through with six-month check-ups and cleanings.

"We have an incredible team of dental hygienists," Dr. Maya said. And because the team is large, families can schedule their check-ups all at the same time. "That's really helpful for busy families."

Another convenience is the office's extended hours, which include three days a week and two Saturdays each month. From pediatric dentistry to root canals and crowns to Invisalign orthodontics and more, Dr. Kim and her team can provide oral health care for every age – all under one roof. Plus, new patients can take advantage of a special offer that includes a comprehensive exam, cavity-detecting digital X-rays (up to 4), a professional cleaning and an oral cancer screening.
