WILLIAMSON HEALTH

Lung Cancer Screening Event

Join us this Lung Cancer Awareness Month for a vital lung cancer screening event, where early detection can save lives and empower our community to breathe a little easier.

To sign up, call (615) 435-5361.

Cost: $150 (self-pay) **Schedule:** November 1-30

Locations: **Williamson Health Outpatient Imaging Center**
4601 Carothers Parkway, Franklin

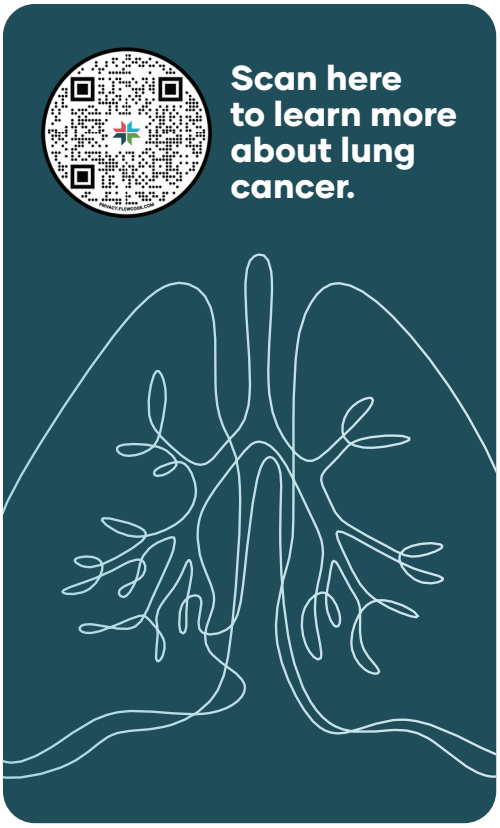

Bone and Joint Institute Main Campus
3000 Edward Curd Lane, Franklin

A low-dose CT scan takes only minutes and helps detect pulmonary nodules—small, firm lumps on the lungs that could indicate cancer.

RISK FACTORS INCLUDE:

- Smoking
- Family history of lung cancer
- Personal history of other lung conditions
- Secondhand smoke
- Exposure to carcinogens

You must call in the month of November to schedule and pay for your low-dose CT screening. Physician referrals are not required, but for follow-up purposes, please be prepared to provide contact information for your primary care physician. Patients typically only get this scan if they qualify through their insurance, but by way of this special November opportunity, anyone can have the scan performed.

This examination is not to be considered a substitute for a clinical examination by a physician. A low-dose CT scan is intended only to be a screening test for lung cancer, and the results of this examination should be taken into careful consideration by the patient's own physician in the context of other factors such as relevant history, physical examination and other indicated or related investigations. Williamson Health is not responsible for any adverse consequences from not sharing the scan results with your doctor. **As a self-pay opportunity, this screening will NOT be submitted to insurance.**
