

ORDER OF PUBLIC HEALTH MADISON & DANE COUNTY

DATE OF ORDER: April 29, 2021
Goes into effect May 5, 2021 at 12:01 a.m.

EMERGENCY ORDER #16

Since Emergency Order #15, Dane County has sustained the longest plateau period since May 2020. Case levels have wavered up and down slightly since the end of February, but overall we are in a period of sustained stability. The fact that stability is occurring as neighboring states are seeing increasing case rates bolstered by the presence of the more transmissible variant, B.1.1.7, is promising. On April 7, when Emergency Order #15 was enacted, the 7-day case average was 78 and the 7-day hospitalization average was 23. As of April 26, the case average has decreased to 64 cases per day, and 7-day hospitalization average has slightly increased to 32. Hospitalization levels remain five-fold lower than the fall 2020 peak.

Reducing the spread of illness, preventing severe outcomes, and death remains a foundational public health goal of managing the pandemic—a goal that is becoming more attainable as case rates decrease and vaccination coverage increases. As of April 27, 92.7% of people aged 65 and older in Dane County had received at least one dose of vaccine—a critical step in protecting the population most at risk of severe outcomes and death. County-wide, the vaccination rate is approaching 60% with at least one dose. The increase in coverage has been most rapid among the 16-17 year old age group—currently, 51.5% have at least one dose in Dane County. People between 35 and 64 have high coverage as well—all over 70% with at least one dose. Our county's population is approaching a high level of vaccination-conferred immunity.

A cautious, and stepwise reopening has remained Dane County's approach—an approach that has likely contributed to Dane County having one of the lowest case rates in the state despite it being a population center. Masking, distancing, and staying outdoors remain key prevention tools, particularly given that a more transmissible variant of concern has been detected in Dane County. However, now we have an even more impactful prevention tool—vaccination.

In response to the steady trend in cases and hospitalizations alongside the increasing rate of vaccination, these orders take continued steps toward reopening.

Based upon the foregoing, I, Janel Heinrich, Public Health Officer of Madison and Dane County, by the authority vested in me by the Laws of the State, including, but not limited to, Wis. Stats. Secs. 252.03(1), (2) and (4), order the following as necessary to prevent, suppress, and control the spread of COVID-19:
