GOVERNORS RACE TIGHTENS TRUMP IMPEACHMENT COULD BE HELPING BEVIN

Republican Governor Matt Bevin has pulled into a tie with Democratic challenger Andy Beshear. Statewide, 46% of likely voters now support Bevin and 46% back Beshear. At the beginning of the year, Beshear held a 48%-40% lead over Bevin.

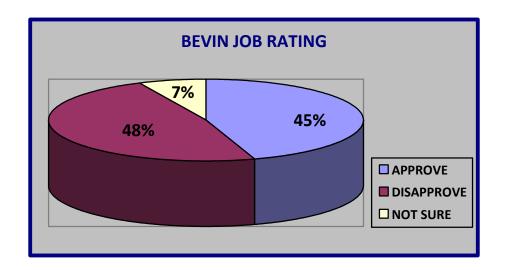

| GOVERNOR VOTE | BESHEAR | BEVIN | HICKS | <u>UND</u> |
|----------------------|----------------|--------------|--------------|------------|
| December 2018 | 48% | 40% | N/A | 12% |
| October 2019 | 46% | 46% | 1% | 7% |

Bevin is bringing Republican voters back into the fold, with his GOP support increasing from 67% in December to 77% at present. Bevin is also receiving a stronger cross-over vote, drawing 22% of Democrats compared to Beshear's 15% from Republicans.

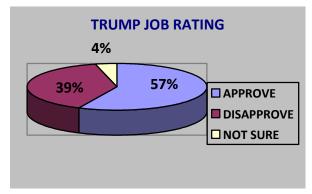

Bevin leads among men, older voters and those in rural regions. Beshear is stronger with women, younger voters and those in the state's metropolitan areas.

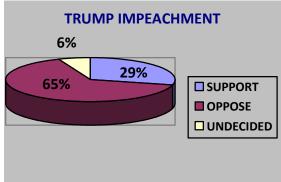

While still more negative than positive, Bevin's job rating has improved over the past ten months. Statewide 45% now approve of his performance (up from 38%), while 48% disapprove (down from 53%).

| BEVIN JOB RATING | <u>APPROVE</u> | DISAPPROVE | NOT SURE |
|------------------|----------------|-------------------|------------|
| December 2017 | 45% | 41% | 14% |
| December 2018 | 38% | 53% | 9% |
| October 2019 | 45% | 48% | 7 % |

Bevin's resurgence could be attributed to President Donald Trump's popularity in Kentucky and strong resistance to his impeachment among its voters. Statewide, 57% approve of Trump's performance as president and 65% oppose efforts to impeach and remove him from office.

HOW THE POLL WAS CONDUCTED

This poll was conducted by Mason-Dixon Polling & Strategy, Inc. of Jacksonville, Florida from October 10 through October 13, 2019. A total of 625 registered Kentucky voters were interviewed statewide by telephone. All indicated they were likely to vote in the 2019 statewide general election

Those interviewed were randomly selected from a phone-matched Kentucky voter registration list that included both land-line and cell phone numbers. Quotas were assigned to reflect voter turn-out by county.

The margin for error, according to standards customarily used by statisticians, is no more than ±4 percentage points. This means that there is a 95 percent probability that the "true" figure would fall within that range if all voters were surveyed. The margin for error is higher for any subgroup, such as a gender or party grouping.
