"Social distancing means a person does NOT interact in person with anyone who doesn't live under their roof." said Kathy Gifford, Nurse Supervisor for the local health department.

"I do not have the right to endanger the lives of others by not social distancing." commented Noel Coplen, Director of the local health department.

We must make social distancing a priority for the sake of our entire community. We all have to be strong.

What The Local Health Department is Doing:

To help limit the spread of COVID-19, social distancing steps have been taken by our community. The contacts of the confirmed positives individuals are under quarantine for the protection of the public.

What The Public Can Do:

- **STAY CALM:** You are not alone in this. Your community is here to support you. Talk to your friends and family and let them know if you are having concerns.
- **STAY APART:** Keep at least 6 feet away from others including while shopping for life-sustaining essentials. Avoid the lines by taking advantage of pick-up or delivery services for groceries and other goods.
- **STAY PUT:** Keep non-essential trips to a minimum and cancel your travel plans. Unless it is essential you go out, stay home.

Be mindful of those who are at greater risk for contracting this virus, including older adults and those with underlying health conditions. Those more at risk should ask others to help with their life sustaining activities, i.e. food, medications or other necessities.

Call your healthcare provider:

If you experience fever, cough, and shortness of breath (flu like symptoms), stay home and call your healthcare provider before going to a healthcare facility. Inform them of your symptoms.
