Please note for hospitalizations: Information about hospitalization status is gathered at the time of diagnosis, therefore this information may be incomplete. This number indicates the number of patients that were ever hospitalized during their illness, it does not indicate the number of patients currently hospitalized.

Please note for inactive/recovered: ICR defines "inactive/recovered" as people who are (1) at least 14 days beyond their symptom onset date, or are at least 14 days beyond the first test confirming their illness if asymptomatic, and (2) are not deceased.

Please note for deaths: Some deaths may be reported by health care providers, hospitals, medical examiners, local health departments, or others before they are included in the statewide count.

Laboratory Tests		
Test Type	Positive	Negative
PCR	1,159,963	9,376,912
Antigen	314,831	3,436,052
		3,750,883

Positive cases are reported to metro and local health departments as soon as results are available. State numbers are updated weekdays before 5pm and there may be a lag in the reporting of cumulative numbers at the state level. Please note numbers within tables may not add up to total confirmed number of cases due to reporting delays and/or missing data. Percentages may not add up to 100.0% due to rounding.
