

## Modeled Annual Mean PM<sub>2.5</sub> Concentration, 2022-2023

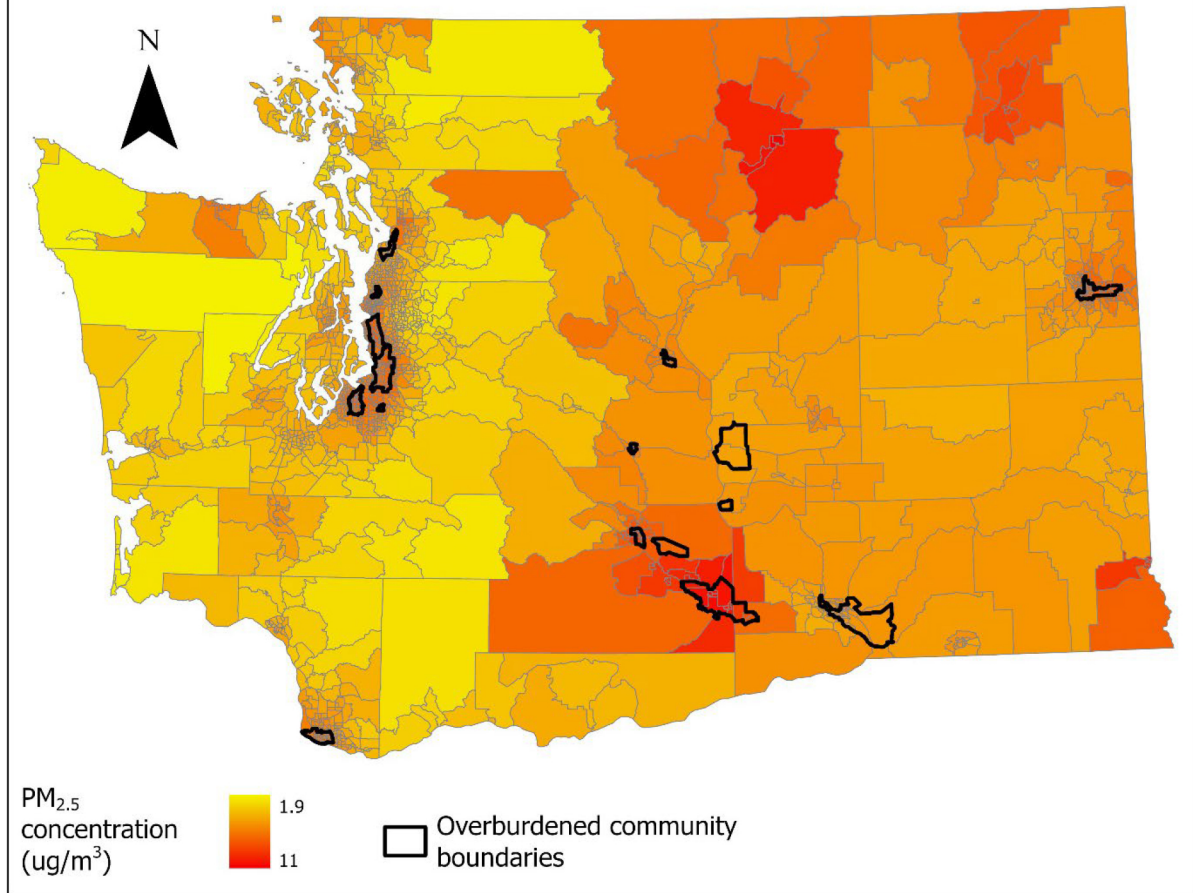

Figure 5. Census tract-level PM<sub>2.5</sub> concentrations based on the WA-Fuse modeled data during 2022-2023. Wildfire days exceeding 35.4  $\mu\text{g}/\text{m}^3$  have been removed. Annual mean PM<sub>2.5</sub> NAAQS concentration is 9.0  $\mu\text{g}/\text{m}^3$ .
